Regulation of the [city/town] Board of Health Restricting the Sale of Tobacco Products

A. Statement of Purpose:

Whereas, there exists conclusive evidence that tobacco smoking causes cancer, respiratory and cardiac diseases, negative birth outcomes, irritations to the eyes, nose and throat;¹

Whereas, the U.S. Department of Health and Human Services has concluded that nicotine is as addictive as cocaine or heroin² and the Surgeon General found that nicotine exposure during adolescence, a critical window for brain development, may have lasting adverse consequences for brain development,³ and that it is addiction to nicotine that keeps youth smoking past adolescence;⁴

Whereas, a Federal District Court found that Phillip Morris, RJ Reynolds and other leading cigarette manufacturers “spent billions of dollars every year on their marketing activities in order to encourage young people to try and then continue purchasing their cigarette products in order to provide the replacement smokers they need to survive” and that these companies were likely to continue targeting underage smokers;⁵

Whereas, the majority (90%) of smokers begin smoking before the age of 25, and over 5 million youth and young adults (ages 25 and under) smoke;⁶

Whereas, cigars and cigarillos, can be sold in a single “dose;” and enjoy a relatively low tax as compared to cigarettes;⁷

Whereas, the Surgeon General found that exposure to tobacco marketing in stores and price discounting increase youth smoking;⁸

Whereas, the U.S. Food and Drug Administration and the U.S. Surgeon General have stated that flavored tobacco products are considered to be “starter” products that help establish smoking habits that can lead to long-term addiction;⁹

Whereas, the U.S. Surgeon General recognized in his 2014 report that a complementary strategy to assist in eradicating tobacco-related death and disease is for local governments to ban categories of products from retail sale;¹⁰

Whereas, ever use of e-cigarettes among students in Massachusetts is 30.9% for high schoolers and 10.9% for middle schools, representing a 20.3% decrease for high schoolers, and a 4.6% decrease for middle schoolers from 2019 to 2021;¹¹

Whereas, the Massachusetts Department of Environmental Protection has classified liquid nicotine in any amount as an “acutely hazardous waste”;¹²

Whereas, the New England Commission on Higher Education requires colleges and universities to maintain a safe and healthy environment for students,¹³ which is incompatible with the sale of tobacco and nicotine products;

Whereas, research indicates that the density and proximity of tobacco retailers increase smoking behaviors, including number of cigarettes smoked per day, reduced smoking abstinence during a quit attempt, and increased smoking prevalence among youth;¹⁴

Whereas, the density of tobacco retailers near adolescents’ homes has been associated with increased youth smoking rates and initiation of non-cigarette tobacco product use;¹⁵

Whereas, tobacco retailers are more prevalent in underserved communities, especially in neighborhoods with a higher proportion of African American or Hispanic residents;¹⁶

Whereas, policies to reduce tobacco retailer density have been shown to be effective and can reduce or eliminate social and racial inequities in the location and distribution of tobacco retailers;¹⁷

Whereas, the Massachusetts Supreme Judicial Court has held that “. . . [t]he right to engage in business must yield to the paramount right of government to protect the public health by any rational means.”¹⁸

Now, therefore it is the intention of the [city/town] Board of Health to regulate the sale of tobacco products.
